

**Product Backlog
Refinement
Sessions**

```
graph TD; A[Product Backlog Grooming Sessions] --> B[Product Backlog Refinement Sessions]; B --> C[Product Backlog Prioritize]; C --> A;
```

The diagram illustrates a cyclical process for managing a product backlog. It consists of three main stages arranged in a circle, each represented by a white rectangular box with an orange border. The stages are: Product Backlog Grooming Sessions (bottom left), Product Backlog Refinement Sessions (top), and Product Backlog Prioritize (bottom right). Arrows indicate a clockwise flow from Grooming to Refinement, from Refinement to Prioritize, and from Prioritize back to Grooming.
